National Park Service Beach Access Report for August 19, 2010

FOR IMMEDIATE RELEASE: August 19, 2010
CONTACT: 252-473-2111, ext. 148

Cape Hatteras National Seashore beaches are being managed under the terms of the U.S. District Court approved consent decree. Park visitors can expect to see resource closures for breeding shorebirds in effect to varying degrees from mid-March to mid-to-late-August and sea turtle nesting closures may occur until early November. Shorebird pre-nesting closures were established at the inlets, Cape Point, and South Beach in March. As soon as subsequent breeding activity is observed, the consent decree requires that automatic, non-discretionary buffers be implemented.

As of **August 19, 2010**, of the constantly changing, fluctuating estimated 68 miles of ocean shoreline within Cape Hatteras National Seashore, approximately **30.9** miles of ocean shoreline is open to ORV and pedestrian access; approximately **27.9** miles of ocean shoreline is open to pedestrian only access; approximately **4.0** miles of ocean shoreline is considered “limited access” (areas that are open but may require hiking off-trail to access); and approximately **5.5** miles of ocean shoreline are temporarily closed to all public access due to shorebird and sea turtle resource protection areas. The latest Google Earth beach access map can be viewed at: <http://www.nps.gov/caha/planyourvisit/googleearthmap.htm>. For more information, check the National Seashore’s website at: <http://www.nps.gov>.

As of May 1, 2010, all Seashore beaches are closed to off-road vehicles between the hours of 10:00 p.m. to 6:00 a.m. in accordance with the court ordered consent decree. The 10:00 p.m. to 6:00 a.m. prohibition on beach driving will remain in effect until November 15, 2010.

The annual seasonal closures of village beaches to off-road vehicle (ORV) use within the National Seashore went into effect at 6:00 a.m. on Saturday, May 15, 2010. Beach driving speed limits are reduced to 15 mph in all locations open to ORV use, unless otherwise posted, from May 15 through September 15. The ORV closures are established in village beach areas that receive heavy pedestrian use, including areas adjacent to Coquina Beach and the villages of Hatteras and Ocracoke Islands.

The Beach Access Report is issued every Thursday throughout the breeding season and will briefly summarize the current status of access in each section of the Seashore listed below. **Updated news will be reported weekly in bold, BLUE print.**

Note: *All distances are approximate. The mileage is determined on a weekly basis using GIS data and is divided geographically by island this year. Closure conditions may change in the field on short notice. **On-site signage, rather than the Beach Access Report or the Google Earth map, is the most accurate and current indication of what is open or closed to the public.** Closed areas are clearly marked in the field with “symbolic fencing” consisting of wooden or carsonite posts, closure signs, string, and flagging tape. Knowledge of tidal changes and caution should be exercised while traveling the beaches of the park. Pets are strictly prohibited in resource protection areas. Elsewhere, pets must be physically restrained at all time on a leash not exceeding 6 feet in length. For more information, please contact: cyndy_holda@nps.gov or call 252-473-2111, ext. 148.

Bodie Island (Ramp 1 to Oregon Inlet; 5.7 miles of shoreline)

Mileage Summary: 3.1 miles open to ORVs and pedestrians; 1.3 miles open to pedestrians only; 0.9 of a mile of limited access; 0.4 of a mile closed to public access due to resource closures.

Ramp 1 - Ramp 2 (Coquina Beach Area) (1.2 miles)

Status: The beach is open for pedestrian access, but not for ORV access.

Ramp 2 - Ramp 4 (2.4 miles)

Status: Ramp 2 is open for pedestrian access, but not for ORV access. From Ramp 4 north, the beach is open for ORV and pedestrian access for approximately 2.4 miles.

Ramp 4 – Oregon Inlet (Bodie Island Spit: 2.1 miles)

Status: The beach is open for ORV and pedestrian access 0.8 of a mile south of Ramp 4, where a resource protection area precludes through access to the inlet. There is 0.3 of a mile of “limited access” inlet shoreline for pedestrians at the southern end of the Spit. The area is located east of, and close to, the Bonner Bridge and is accessible by boat.

Hatteras Island (Village of Rodanthe south to Hatteras Inlet; 42.8 miles of shoreline)

Mileage Summary: 22.0 miles open to ORVs and pedestrians; 17.6 miles open to pedestrians only; 2.5 miles of limited access miles; 0.7 miles closed to public access due to resource closures.

Villages of Rodanthe, Waves, and Salvo - Ramp 23: (Pea Island NWR boundary to Ramp 23 – 5.3 miles)

Status: The beach is open for pedestrian access, but not for ORV access in front of the villages of Rodanthe, Waves, and Salvo. There is pedestrian access for 5.3 miles.

Ramp 23 - Ramp 27: (4.3 miles)

Status: Ramp 23 is open to ORV and pedestrian access. A resource closure extends from 0.1 of a mile north of Ramp 23 to the Salvo Village boundary and precludes ORV and pedestrian access. There is through ORV and pedestrian access between Ramp 23 and Ramp 27.

Ramp 27 - Ramp 30: (2.0 miles)

Status: There is through ORV and pedestrian access from Ramp 27 to Ramp 30.

Ramp 30 - Ramp 34: (4.3 miles)

Status: The beach is open for ORV and pedestrian access for 0.1 mile south of Ramp 30 where a full beach sea turtle protection area precludes through ORV access. Several full beach protection closures for sea turtle nests are located for the next 2.3 miles and preclude ORV access. There are “limited access” areas between the sea turtle protection closures. There is ORV and pedestrian access for approximately 1.4 miles north of Ramp 34.

Ramp 34 - Ramp 38: (3.9 miles)

Status: The beach is open for ORV access for approximately 0.4 of a mile south of Ramp 34. The beach in front of Avon Village is open for pedestrian access, but not for ORV access. There is pedestrian access for 3.9 miles.

Ramp 38 - Ramp 43: (6.0 miles; includes the Haulover soundside & Buxton Village)

Status: The beach is open to ORV and pedestrian access for 2.3 miles south of Ramp 38. Pedestrian access is open for approx. 1.6 mile north of the Buxton Village boundary. From Ramp 43 north, the beach is open to ORV and pedestrian access for 0.4 of a mile.

Ramp 43 - Ramp 44: (0.4 of a mile)

Status: Ramp 43 is open. A sea turtle protection area located 0.2 of a mile south of Ramp 43 precludes through ORV and pedestrian access to Ramp 44.

Ramp 44 - Ramp 45: (Ramp 44 to tip of Cape Point: 1.0 miles; Cape Point tip to Ramp 45: 1.4 miles)

Status: Ramp 44 is open to ORV and pedestrians access south along the east side of Cape Point for approximately 1.0 mile and then west to Ramp 45 for approximately 1.5 miles for a total of 2.5 miles. This includes the tip of Cape Point and the “hook” area, the by-pass route at “the narrows,” the Inter-dunal Road between Ramp 44 and Ramp 45 and Salt Pond Road.

Ramp 45 - Ramp 49: (South Beach: 3.4 miles)

Status: Ramp 45 is open and there is ORV and pedestrian access for 2.0 miles to the west. Ramp 49 is open and there is ORV and pedestrian access for 1.4 miles east toward Cape Point. A full beach closure for a sea turtle protection area precludes through access for ORV and pedestrians.

Ramp 49 - Ramp 55: (5.9 miles; includes Frisco and Hatteras Village)

Status: The beach is open to ORV and pedestrian access south of Ramp 49 for approximately 0.7 of a mile where a full beach sea turtle protection area is located. In addition to pedestrian access in front of Frisco Village, there is pedestrian, but not ORV, access from the northern Frisco village line northeast for 0.4 of a mile and south of the southern Frisco Village line to Ramp 55.

Ramp 55 - Hatteras Inlet: (Hatteras Inlet Spit: 2.6 miles)

Status: ORV and pedestrian access is open along the ocean shoreline from Ramp 55 south/west to Hatteras Inlet and the “Rip.” The Pole Road is open to ORV and pedestrians from Ramp 55 south to the Spur Road. Cable Crossing area is open (with limited parking). The Spur Road is open. The pre-nesting areas at the overwash fans and the inlet have been removed.

Ocracoke Island (19.9 miles of shoreline)

Mileage Summary: 5.8 miles open to ORVs and pedestrians; 9.0 miles open to pedestrians only; 0.6 limited access miles; 4.4 miles closed to public access due to resource closures.

Hatteras Inlet (North Ocracoke Spit) to Ramp 59: (1.3 miles)

Status: Ramp 59 is open to ORV and pedestrian access. A resource protection closure, located 0.2 of a mile north of Ramp 59 precludes access for ORV to the north end and the inlet. There is 0.6 of a mile of “limited access” of inlet shoreline on the northern tip of Ocracoke for pedestrians.

Ramp 59 - Ramp 67: (7.8 miles)

Status: Ramp 59 is open to ORV and pedestrian access for approximately 0.2 of a mile north where a full beach closure for nesting colonial waterbirds precludes access for ORV and pedestrians to the inlet. There is ORV for 1.0 of a mile south of Ramp 59 and 0.8 of a mile north of Ramp 67 where a full beach sea turtle protection area precludes through access.

Ramp 67 - Ramp 70 (includes Ramp 68): (3.8 miles; includes Ramp 68)

Status: The beach is open for ORV and pedestrian access for approximately 0.8 mile north of Ramp 67 and 0.6 of a mile south of Ramp 67. The beach in front of the Ocracoke Campground and the Ocracoke Day Use area is open for pedestrian access, but not for ORV access.

Ramp 70 - Ramp 72: (1.8 miles)

Status: The beach is open for ORV and pedestrian access for approximately 0.6 of a mile south of Ramp 70 where a full beach closure for sea turtle nesting protection areas preclude through access to Ramp 72. There is 1.0 mile of ORV and pedestrian access north of Ramp 72.

Ramp 72 to South Point: (2.6 miles)

Status: The beach is open to ORV and pedestrian access on the ocean shoreline for approximately 1.6 miles south of Ramp 72. A resource protection closure precludes through access for ORV and pedestrians to the inlet. The former “limited access” section of inlet shoreline on the tip of South Point is now closed to all public entry for AMOY breeding activity.

Temporary resource protection areas are necessary to protect threatened and endangered species and species of concern including piping plovers, American oystercatchers, colonial waterbirds (3 species of terns and black skimmers), and sea turtles. Posted areas are closed to vehicles, pedestrians, and pets.
